

# Québec Law 25

Leverage the Power of LightBeam Automation

### Know WHAT Data You Have

- Restricted
- Confidential
- SSN
- Medical Number
- AWS API Key
- Credit Card

### Know WHOSE Data You Have

Jane Doe

**At Risk**

POLICIES VIOLATED

- Cross Border
- Information Leakage

### Mitigate Risks With AUTOMATION

- Redact
- Delete
- Archive

## Québec Law 25 : A Primer

On Sept 21, 2021, the Québec National Assembly passed Bill 64 (now known as Law 25) to modernize legislative provisions regarding the protection of personal information. If you carry personal data about individuals/consumers, Law 25 may apply to you.

Some of the key provisions of the law include aspects such as process and procedure to handle PII, addressing data subject requests, designation of privacy officers, right to be forgotten (RTBF), breach reporting and notification requirements among others.

## Automate and Accelerate Compliance with LightBeam

LightBeam is the only platform that combines **sensitive data discovery** with **simplified 1-click workflows**, helping you meet key provisions of the law with ease. LightBeam is available both as a hosted SaaS solution (deployed in your environment) or as a SaaS solution.

# Leverage Lightbeam to comply with Québec Law 25

## Auto-Discover and Inventory Personal Data

### WHAT sensitive data do you carry

Automatic discovery of sensitive personal data across your key applications such as databases, datalakes, and unstructured data repositories (O365, Gsuite, S3, Jira, SNOW etc.).

### WHOSE sensitive data do you carry

Unique identity-centric approach linking data fragments to data subjects.

### Mitigate Risks with Automation

Automation framework to help you automatically alert/anonymize/redact sensitive content detected in violation of your organization's policies.

# Leverage Lightbeam to comply with Québec Law 25

## Simplified 1-Click Workflows

### Data Subject Request (DSR) - Access and Erasure

Get a catalog of your customers' personal data present across your applications, and automate data subject access/erasure requests.

### Privacy Impact Assessment (PIAs)

Use the power of continuous scanning to do PIAs for any process or data source.

### Virtual Privacy Consultant (optional)

- In-charge of managing LightBeam, and onboarding your applications.
- Monitors data subject requests and policy violations, keeping you continuously compliant.
- Access to the LightBeam Privacy Officer to review best practices.

# About LightBeam

A leader in the **security & privacy posture automation**, LightBeam has rapidly gained customers' trust by pioneering a unique identity-centric and automation-first approach. Unlike siloed solutions, LightBeam ties together **cataloging**, **control**, and **compliance** across structured and unstructured data applications providing 360-visibility, masking, redaction, archival, and deletion of sensitive information.
